WORK EXPERIENCE

Web/Mobile App Developer and DevOps Engineer -

• Limitless Minds

May 2022-Present
(Remote)

- Working with React-Native and React as Front-end developer and transitioned from intern to full-time developer.
- Interacting and working closely with the CTO, COO, CSO, and President for decisions and changes to production and updates of mobile application.
- Writing code in TypeScript and JavaScript with React-Native and React frameworks for mobile and web applications.
- Using an agile workflow to utilize Jira for ticket management and implementing DevOps systems.
- Cross-trained for Back-end Development to begin remapping the backend of mobile application to define the dev environments while gaining a functional knowledge and working experience of using Azure, AWS, and now GCP to migrate to cloud services to achieve full-ownership of the backend of the mobile and web application.
- Addressing large decisions with the dev team in regards to creating the CI/CD pipeline and determining how the team will expand and add in new members.

Web App Developer - Simple Tech Talk

• Feb 2019 - Jan 2022
(Remote)

- Meet with clients for input for design and implementation of client's project.
- Freelance software development of complex UI and Sass interfaces.
- Working predominantly with React.js, and Vue.js while utilizing Bootstrap, Material UI, Semantic UI, and Vuetify.
- Routing APIs with Axios, RESTful routing, using MySQL, and Github.
- Mobile application development using React-Native based on client needs.
- Web application development using React based on client needs.
